

Wholesale 11311-54052 Auto Engine Part Oil Pump For TOYOTA Hilux

Our Product Introduction

For more products please visit us on automobile-sparepart.com

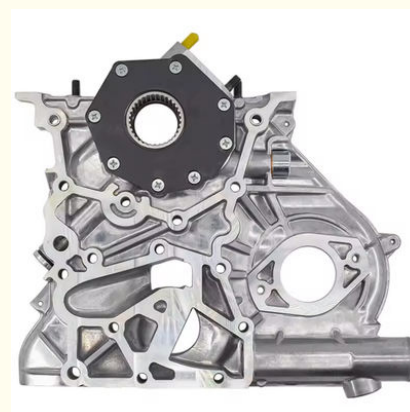

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 11311-54052
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-35 days
- Payment Terms: D/P, L/C, T/T

Product Specification

- Product Name: Oil Pump
- Size: Standard
- Warranty: 12 Months
- Highlight: TOYOTA Hilux Engine Oil Pump,
TOYOTA Hilux Part Oil Pump,
11311-54052 Engine Oil Pump

Product Description

Product Description:

The oil pump plays a pivotal role in maintaining the health and efficiency of an internal combustion engine. As a crucial component, its primary function is to ensure the continuous flow of engine oil to various moving parts within the engine. Its importance cannot be overstated, as it helps to minimize the friction between these parts by providing necessary lubrication. This not only allows the engine to operate smoothly but also prevents excessive wear and tear on the moving components. Furthermore, the oil pump is designed to deliver a steady and sufficient supply of oil. This is critical for the engine's performance, ensuring that all parts are adequately lubricated for optimal functioning and are kept cool to avoid overheating risks.

Features:

High-Quality Oil Pump Features

Efficient Oil Circulation

Designed for efficiency, our oil pump effortlessly draws and channels oil from the sump to the engine's pivotal areas. It maintains a stable, consistent oil current, enhancing lubrication, while diminishing both friction and the deterioration of essential engine parts.

Durable Construction

We commit to high-caliber materials in crafting our oil pumps, with options ranging from sturdy cast iron to resilient aluminum. Built to cope with vigorous engine conditions—like extreme heat and pressure—our pumps promise endurance and steadfast performance. Precision and Dependability

Our oil pumps boast meticulous engineering with superior internal components, such as gears or rotors, all finely machined for seamless function. The result is unwavering oil pressure and flow, sustaining your engine at peak efficiency.

Enhanced Lubrication and Cooling

The oil pump tackles the dual task of lubricating and cooling the engine's inner workings. Optimal lubrication curbs friction and attrition; effective cooling dissipates heat—both critical factors in bolstering the engine's lifespan and functionality.

Rigorous Quality Assurance

Subjected to stringent testing and quality control, our oil pumps must pass an array of performance checks. Conforming to industry benchmarks and fortified by a warranty, each pump instills confidence and gets backed by our commitment to your satisfaction.

Applications:

Superior Engine Care with Our Premium Oil Pump

To ensure your vehicle operates at peak efficiency and enjoys a long life, consider investing in our top-tier oil pump. With our product, you'll benefit from superior oil circulation that not only ensures your engine parts are well-lubricated but also maintains optimal temperature through reliable cooling.

Our oil pump is designed for durability and peak performance. Confidently depend on the robust construction and high performance of our oil pump to extend the best care to your engine.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years

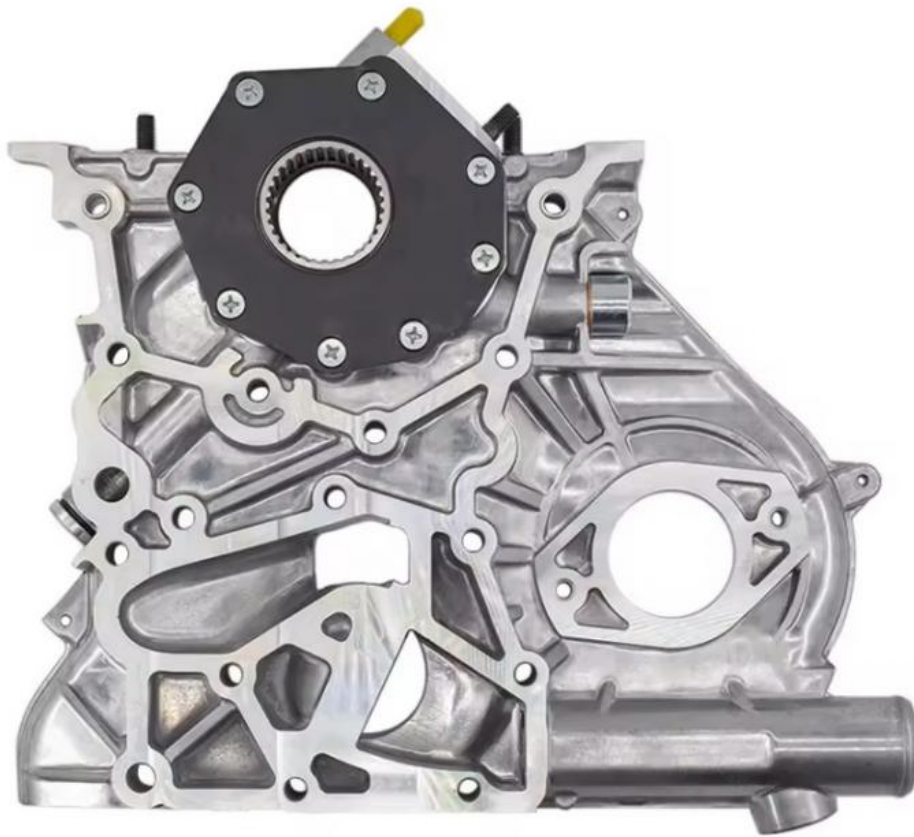

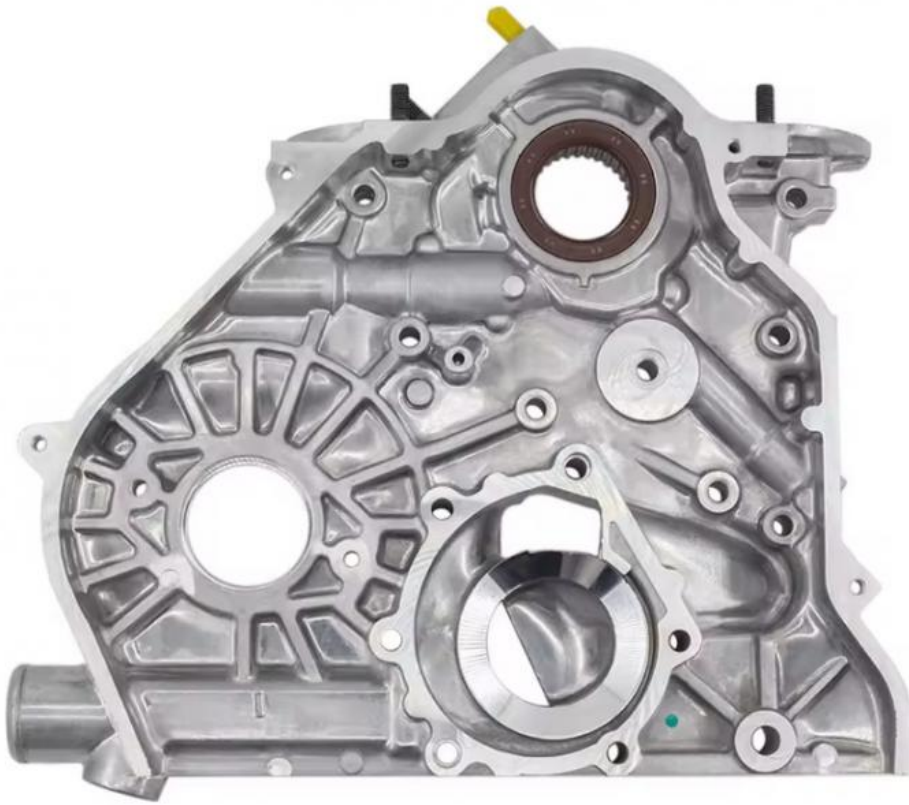

A large of stock

Professional export company

Accept small order

We can design anything well according to customers' requirment
